

Skill Gap Analysis

Generated: June 19,
2026

Current skill levels vs. market requirements for Frontend / UI-UX / Full-Stack roles

SKILL PROFICIENCY VS. MARKET DEMAND

Skill	Level	Proficiency	Status	Market Demand	Action Required
HTML5 / CSS3	90%		Strong	5/5 jobs	Core requirement across all matched roles. Current level is job-ready.
Figma / UI-UX Design	80%		Strong	3/5 jobs	Rare at fresher level. Major differentiator — build a Figma case study portfolio.
DSA / Problem Solving	60%		Good	4/5 jobs	200+ CodeChef problems is solid. Continue LeetCode to reach 300+.
JavaScript (Core)	45%		Build	4/5 jobs	Needed in 4/5 jobs. Priority #1 upskilling area. Focus on DOM, events, fetch API.
Git / GitHub	30%		Build	3/5 jobs	Version control is expected by all employers. Set up GitHub profile with projects now.
Node.js	20%		Early	3/5 jobs	Currently in training. Mention this proactively on applications.
React	15%		Gap	3/5 jobs	Required for 3 roles including the highest-paying. Start React after JS fundamentals.
Python	10%		Gap	2/5 jobs	Not yet started. Required for data science track long-term. Begin in Month 4–5.
Bootstrap / Tailwind	25%		Build	2/5 jobs	Mentioned as plus in multiple roles. Easy add-on after core JS is comfortable.
Cloud / AWS	35%		Training	1/5 jobs	AWS Academy badge is a plus. Cloud skills strengthen data science profile.

PRIORITY UPSKILLING ROADMAP

Month 1–2 (Now)	JavaScript Fundamentals freeCodeCamp JS Algorithms & Data Structures The Odin Project — Foundations Build 2 small DOM projects
Month 2–3	Portfolio & GitHub Upload e-commerce project + any other work Build a personal portfolio website Create Figma case study (mobile app redesign)
Month 3–4	React Basics React official docs + Scrimba React course Rebuild e-commerce project in React Apply to Anohim & similar roles

Month 4-6

Python + Data Science

Python basics (CS50P or Kaggle Python course)

Intro to Pandas, NumPy, Matplotlib

Connect to CSE-DS specialisation
